Att Tech Dept / Mr Andreas Manolatos,

Dear Mr Andreas,

Kalispera,

Regarding yours below, pls inform maker and model of LRIT, as if it is JRC they maintain offices in Brazil (in Rio, but attending at every port), or if it is FURUNO, they maintain certified service shops/engineers at some ports, with possibilities of attending other ports as well.

For better scheduling, would be good to know possible dates in order inform S/Es in regards of programming themselves.

Thanks and

Best Regards

Subject: SUPRA DUKE-LRIT Malfunction – Technician Attendance in Brazil

Dear All,
Good day.

With reference to the below and the reported LRIT malfunction for the subject vessel (Polestar Case ID: 00511812), we understand that remote troubleshooting has been unsuccessful and onboard inspection by a qualified technician is recommended.

Quote:

Please be advised that we have made multiple attempts to restore the vessel's LRIT reporting through remote troubleshooting. While the terminal is acknowledging the commands being sent, it is still not transmitting position reports as required.

Given that remote diagnostics have not resolved the issue, this strongly indicates a potential onboard hardware or configuration fault. In line with the Flag Administration's advice, we kindly recommend arranging for a qualified technician to attend the vessel to physically inspect and diagnose the terminal and associated equipment.

Once the onboard checks have been completed, please keep us informed so we can provide any further support required from our side.

Unquote:

Kindly advise your availability to attend the vessel at Brazilian ports. At this stage, the exact port is not yet confirmed.

Please confirm:

- Your service availability in Brazilian ports
- Earliest attendance time upon vessel's arrival
- Ports covered by your service network
- Any preliminary requirements or information needed prior to attendance

Further updates regarding the vessel's exact port and ETA will be provided once available.

Looking forward to your prompt response.

Best Regards,
(Mr) Andreas Manolatos
