Dear Mr Martins,

thank you for your e-mail.

Could you please advise also PDA for a bunker only call at Rio de Janeiro?

Thank you in advance for your assistance.

Best regards.

Dear Ms. Maria Alexopoulou,

Kalispera!

Please find enclosed the PDA regarding the bunker operation at Rio Grande port.

Kindly note that, as the vessel's arrival drafts are not yet available, we have prepared the PDA for two different inner areas:

- ECHO Area – maximum sailing draft of 9.45m FW
- DELTA Area – maximum sailing draft of 13.0m FW

Please note that operational costs at the ECHO Area are lower, as no pilotage or tug standby services are required.

Regarding Santos, please consider below:

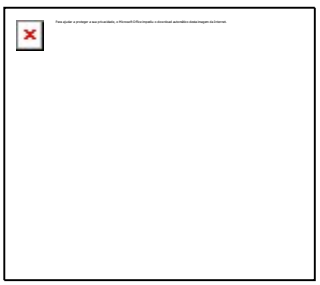

In Santos there are no inner roads and vessels can only receive bunkers alongside, while conducting cargo ops.

If a vessel calls Santos solely for bunkering, it can only take place at a lay-by berth, which involves waiting time and high costs, with the inclusion of full PDA (towage, pilotage, light, berthing and other dues).

Bunkering at outer roads, is prohibited by the authorities.

Should you require any further information or assistance, please do not hesitate to contact our team at any time.

Best regards,

Rafael Martins

Dear Ms. Maria Alexopoulou,

Good Day!

Below message was duly noted with thanks for approaching Sultrade.

Please be so kind as to inform the expected sailing drafts in FW after bunkering supply, as the inner anchorages have different restrictions and costs in Rio Grande port.

For your information, in Santos port, bunker calls only are not authorized to take place at inner anchorages, only at lay-by berths, which raises the port costs considerably.

Thank you and we look forward to your feedback.

Respectfully,

Claugenê Zdradek
