Re : mv Irene Madias - ETA bss Santos on abt 19.07.2026 wp/agw/ucae

Dear Sirs,

Following our previous exchanges, please be advised that vessel will be eventually calling Santos for loading under time charter trip and on Charterers' account.

By this opportunity, kindly note that we intend to perform the underwater inspection at Santos **anchorage**, as part of the bottom Class survey witnessed by BV Class surveyor.

For this operation, one superintendent from our office will most probably fly to Santos in order to be present during the UWI/Class attendance.

While at anchorage, we also intend to perform the annual LSA and Radio surveys

In addition to the above, and after vessel shifts **alongside berth**, we intend to proceed with the following services for our reference and consideration:

-Crew change (Filippino national) 6 on/off
-Forwarding/delivery on board of spares/stores/provisions. For the spares, pls advise the cost per AWB incl customs fees (whether same is subject to actual weight) and whether price is subject to the commercial value of goods
-Pest Control certificate (if required by local regulations) which please advise
-SSCEC renewal (if possible)

Based on the above, please revert with your PDA for the above services including the following:

1. Expenses for attending our supt and the Class surveyor transportation to/from the vessel at the anchorage

2. Entry permits etc expenses and transportation at the anchorage for the surveyors to attend for LSA/Radio surveys
3. Crew change related expenses
4. Forwarding/delivery costs for the spares/stores
5. Pest + SSCEC expenses
6. Your agency fees etc expenses

Thank you in advance for your feedback.

Best Regards,

Foteini Paganeli
Operations Officer
